EUROPEAN URBAN WINERY

Chateau Amsterdam is the first urban winery in the Netherlands, and the biggest one in Europe. Our chateau was founded in 2017 by father and son, and we're located in Amsterdam-Noord. We make wine in the city, for the city. We create three lines of wine. Premium and classical Fathers wines, experimental Sons, plus easy-going Grandsons. And we make Piquette – a sparkling and circular product.

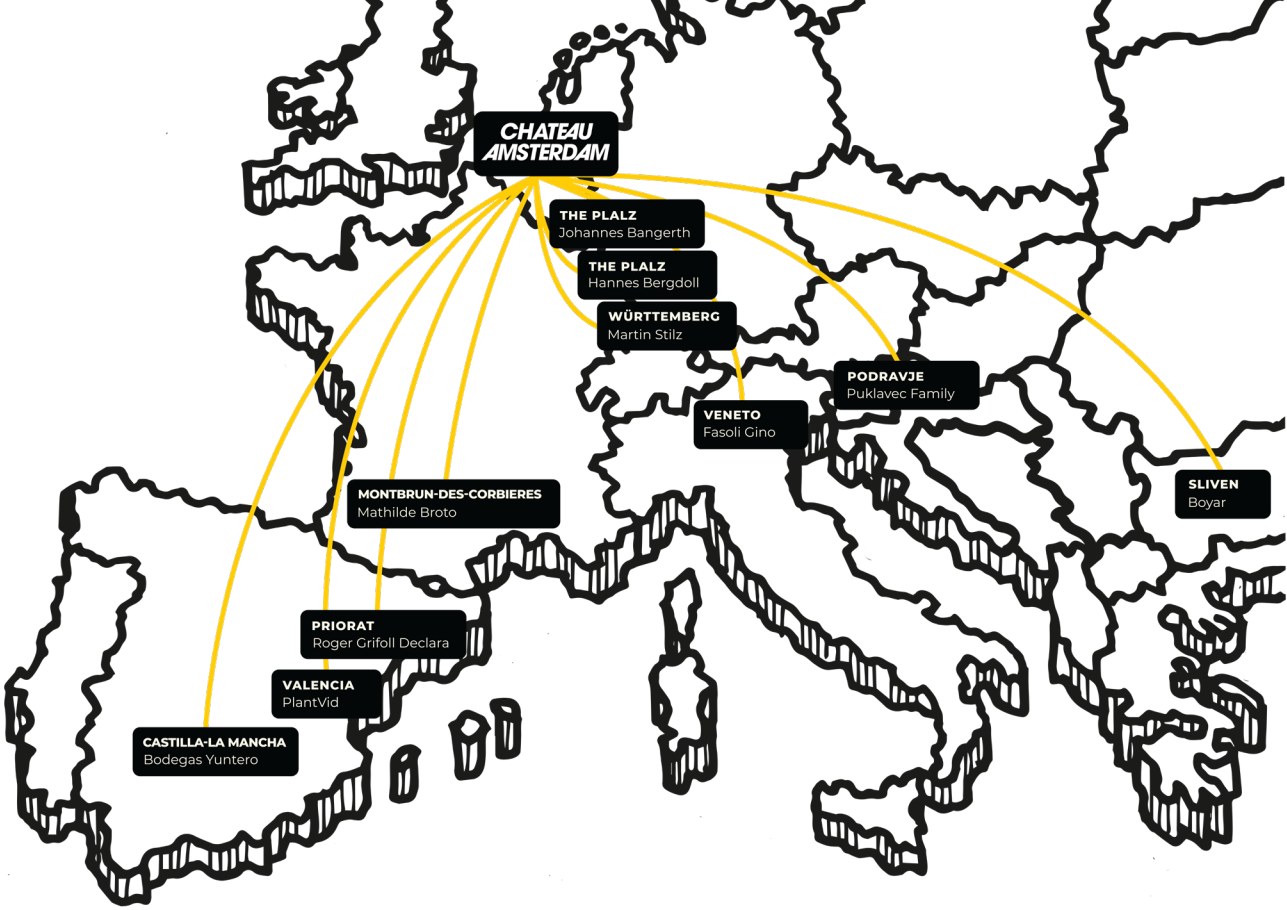
EUROPEAN GRAPES COME TOGETHER IN AN AMSTERDAM WINE

We work with grape farmers from all over Europe who are the best at what they do; grow quality grapes. That gives us more time to focus on what we do best; make quality wine and wine experiences.

We transport grapes instead of bottles. This offers us a unique advantage; we're free from certain wine-country regulations and have the freedom to innovate and experiment with new flavors and experiences of wine. We connect our community with the wonderful world of wine, in the middle of the city – but with an ode to European nature.



GRANDSONS

EASY-GOING

Our accessible grandsons are blends of grapes from different European countries; all in one bottle. Traditionally, wines are produced and bottled where the grapes grow. This makes it easy to define the region, the grape and thus the type of wine. But because we are a European urban winery, we make wines on neutral territory.

Our grapes grow from Slovenia to Spain, from Germany to Italy. So, how do you define a wine with so much diversity of origin? Right: you claim a new term. A term free of rules or regulations, a term that connects Europe in one bottle: a Vin de l'Europe.

SONS

EXPERIMENTAL

Winemaking is an ancient tradition, a world full of rules, dogmas and laws. We break with that in our Sons series. Here we do things differently and we color outside of the lines. It is also on the basis of these wines that one recognizes and remembers a ‘Chateau Amsterdam’ wine.

These are wines that distinguish themselves in taste on the basis of the making process: orange wines, unconventional blends from different countries, use of amphorae and other non-traditional techniques. With this we set trends and inspire other producers.
